FISHERIES RESOURCE CENTRE

Come Join Us!!

Fisheries Habitat Workshop

Based on the success of our previous training workshops, the Anishinabek/Ontario Fisheries Resource Centre is planning to conduct a fisheries habitat workshop on October 15-17, 2008. We encourage you to consider attending if you feel that you would benefit from such a workshop.

This course will be particularly useful for individuals interested in fish habitat, such as you. At the workshop, participants will be able to:

1. Understand and identify warm and coldwater lakes and streams.
2. Learn about fish species abundance.
3. Visually identify impacts upon fish habitat.
4. Find out results from past Serpent River FN fisheries projects.

The workshop will be held at the

Serpent River Community Centre on October 15, 16 & 17, 2008.

The workshop will involve both in-class and hands-on field experience. A/OFRC staff will deliver course content and supply all necessary equipment. Participation in this workshop will include course materials and equipment as well as coffee and lunches. There are openings for up to 20 participants.

Not only will participants of this workshop benefit from this experience, but the communities will also be further ahead in the pursuit of developing fisheries expertise within the area.
